FOREST MANAGEMENT

The cover drawing of a pulpwood pile in a central Canadian mill yard is by Franklin Arbuckle, R.C.A. The logs are the fruit of forest management. They have been protected during their growing period in the industry's woodlands. And as mature trees, with reduced growing power, they have been harvested for use, thereby making way for young and vigorous growth. Forest management with its continuing and overlapping cycles of natural reseeding, protecting, growing, and harvesting is the most effective form of forest conservation.

Introduction

These tables annually present a succinct picture of pulp and paper operations, their intimate relationship with the forest resources and the forest crop, and something, too, of the importance of the industry in the economy of Canada.

Every effort has been made to include herein as many 1957 figures as possible; but in many instances it has been impossible either to obtain the 1957 figures or to provide informed estimates. Particularly is this so of 1957 dollar value figures many of which will not be available from government sources until the end of 1958.

While the material herein is clearly set forth in the index, it should be noted that Section "B" contains a summary of the industry's operations for 1956, and relates the production and markets of that year to the pulpwood harvest. Section "F" contains figures revealing not only the national significance of the industry, but also general statistics covering its operations as a whole.

In Section "D", the Newfoundland statistics have been consolidated, unless otherwise noted, with those of Canada for all years. Elsewhere, Newfoundland figures have been consolidated with those of Canada only since 1949 as prior to that year they were not compiled on the same basis as those of the Dominion Bureau of Statistics. The figures covering Newfoundland's production up to 1948 will be found in Tables 34, 45, and 70.

The publication of these tables has largely been made possible through the kindly aid of L. J. Pouliot, chief of the Forestry Section of the Dominion Bureau of Statistics; and to him grateful acknowledgment is made.

Table 6. Depletion and Growth, 1957

Pulp and Paper Woodlands

The pulp and paper mills lease 182,840 square miles of forest, or slightly more than 117 million acres. Over the past five years, the wood taken by the mills from this acreage has averaged 8½ million cords a year. Such a cut runs to an average of 6¼ cubic feet per acre per year to which, in order to obtain the total depletion, must be added the losses caused by fire, insects, disease, and natural mortality.

Scientific measurements all reveal that the overall growth in these leased forests exceeds the cut plus all other losses. This excess of growth serves to increase the standing volume of pulpwood which, in most instances, will render the acreage more productive and so permit larger annual harvests to meet the growing needs of the future.

Source: Woodlands Section, Canadian Pulp and Paper Association.

The National Forests

The inventory of productive forests which cover a quarter of Canada's whole forest area, is nearing completion. Simultaneously, a large quantity of new information relating to growth rates in the productive forests is being assembled. Preliminary estimates indicate that annual growth rates over a considerable portion of the productive forests range between 25 and 40 cubic feet per acre. Annual depletion on the accessible productive forests, for which it is possible to give a more accurate figure, averages about 8 cubic feet per acre, and includes cutting and losses from fire.

This is not the whole story. This seemingly favourable balance on a national scale is tempered by the following conditions:

1. The annual depletion caused by insects and disease, for which reliable estimates do not exist, is believed to exceed the losses from fire.
2. Regional examples of over-cutting in the more accessible areas indicate that control and adjustment is necessary to bring cut in line with growth potential.
3. Greater costs may be encountered in developing more remote supply areas.

a: 1920-39, production estimated on the basis of consumption plus exports minus imports; includes small quantities of sawmill chips, slabs and edgings, sawdust, butts and cores. 1940-57, revised data showing actual production; excludes wood-waste used for making pulp.

b: 1920-39, includes small quantities of wood-waste used for making pulp. 1940-57, excludes wood-waste consumption; includes recalculated volumes for B.C. consumption.

c: 1940-57, includes recalculated volumes for B.C. exports; peeled wood volume converted to rough cords.

d: Imports not reported prior to 1928. 1940-57, "Trade of Canada" data assumed to represent peeled wood and converted to rough cords.

e: Canadian Pulp and Paper Association estimate.

Source: Dominion Bureau of Statistics.

Table 9.
Cords, Cubic Feet, and Board Measure

A standard cord is a stack of wood 4 x 4 x 8 feet containing 128 cubic feet of wood, bark, and interstices. A cord usually contains about 85 cubic feet of solid wood, but the content varies with the size of the logs.

In the lumber industry, wood is usually measured by the board foot. A board foot is the equivalent of a board one inch in thickness and one square foot in surface area. The relationship between board measure and cord measure varies in different sections of the Dominion. Usually, 2 cords are considered to be equivalent to about 1000 feet board measure. But this ratio also varies with the size and type of the wood.

One cord of peeled pulpwood is equivalent to 1.125 cords of rough or unpeeled wood.

British Columbia	1,641,401	35,451,247
Other Provinces	3,078,622	75,932,163
Canada	15,797,181	$410,521,845
Pulpwood Imports	188,144	2,947,688
Total Supply	15,985,325	$413,469,533
Less Pulpwood Exports	1,953,470	44,206,488
Pulpwood Used	14,031,855	$369,263,045
Other Wood Used (b)	936,370	18,882,759
Total Wood Used in Mills	14,968,225	$388,145,804

* Roundwood only, i.e. whole logs and bolts.

(a) Quantities are given in terms of rough or unpeeled wood. One cord of peeled pulpwood is equivalent to 1.125 cords of rough or unpeeled wood.

(b) Residual wood, such as sawmill and veneer mill chips, slabs and edgings, sawdust and butts and cores.

Source: Dominion Bureau of Statistics.

Table 14.
Pulp Supply

From the 14,968,225 cords of wood used in the mills, the following pulps were manufactured in 1956:

	Tons	Value
Groundwood pulp	5,723,002	$231,236,271
Chemical pulp	4,645,493	463,880,858
Other pulp*	365,249	11,115,405
Total Wood-Pulp Production	10,733,744	$706,232,534
Wood-pulp imports	63,904	8,117,220
	10,797,648	$714,349,754

In addition to wood-pulp, the following fibrous materials were used in 1956 in the production of certain grades of paper and paperboard:

Rag, cotton and flax waste and sweepings, and cotton linters	23,629	$ 1,981,661
Old and waste paper and broke (purchased)	447,092	14,783,544
Side runs (purchased)	10,008	715,480
Straw	21,392	390,494
Flax fibre	1,921	235,985
Fibre and leather scrap	3,123	72,256
Manilla stock, including jute bagging, rope, waste, thread, etc.	762	71,350
Other paper stock	234	11,232
Total Other Stock Used	508,161	$ 18,262,002
Total Stock	11,305,809	$732,611,756
Pulp inventories at pulp and paper mills at the beginning of the year	114,564e	12,838,325e
Total	11,420,373	$745,450,081
Less pulp inventories at pulp and paper mills at the end of the year	182,284e	19,414,143e
Sold, or converted into paper, paperboard and other board	11,238,089	$726,035,938

* Includes screenings, off-quality, semi-chemical, defibrated and exploded pulp.

e: Canadian Pulp and Paper Association estimate.

Table 15.
Shipments by Products

From the 11,238,089 tons of pulp available for conversion or sale in 1956 the following products were manufactured and shipped:

Wood-pulp:	Tons	%	Value	%
To Canadian customers	308,494	2.76	$ 39,878,404	2.82
To Canadian affiliated mills	215,473	1.92	21,830,449	1.54
To foreign customers (a)	2,390,285	21.36	305,109,828	21.58
Total, Wood-Pulp	2,914,252	26.04	$ 366,818,681	25.94
Newsprint (b)	6,432,874	57.49	$ 734,425,972	51.93
Paperboard and Other Boards:				
Paperboard	857,087	7.66	$ 120,584,442	8.53
Building boards	228,742	2.05	24,456,222	1.73
Wet machine boards	8,389	.07	1,580,699	.11
	1,094,218	9.78	$ 146,621,363	10.37
Other Papers:				
Wrapping papers	268,751	2.40	$ 57,797,757	4.09
Book and writing papers	333,590	2.98	85,058,290	6.01
Tissue and sanitary papers	48,242	.43	14,384,627	1.02
Building papers	91,179	.82	7,014,558	.50
Special industrial papers	7,038	.06	1,988,891	.14
	748,800	6.69	$ 166,244,123	11.76
Total Paper and Board	8,275,892	73.96	$1,047,291,458	74.06
Total Shipments of Pulp and Paper	11,190,144	100.00	$1,414,110,139c	100.00
Converted paper products			$ 33,342,826	
By-products and miscellaneous services			$ 5,988,761	
Total Value of Mill Shipments			$1,453,441,726	

a: Including shipments to subsidiary or affiliated companies.

b: Dominion Bureau of Statistics classification includes some grades not classed as newsprint by the Newsprint Association of Canada.

c: As much of the pulp and paper shipped to Canadian customers was utilized in the manufacture of paper products, there is some duplication in this figure.

Source: Dominion Bureau of Statistics.

Table 16.
Wood-Pulp Use and Sale

Tons	Production	Imports	Exports	Consumption by Canadian Paper Mills	Apparent Domestic Sales or Inventory Changes (a)
Groundwood	5,723,002	—	290,418	5,439,237	— 6,653
Sulphite, paper grades	2,561,470	42,604	691,284	1,796,753	116,037

a: For years prior to 1946, breakdown of total screenings exports into chemical and mechanical screenings estimated on basis of known quantity and value "made for export".

Other footnotes: See Table 21.

Note: Screenings were not reported separately prior to 1923. It is assumed that these were included with "Other wood pulps". Exports of screenings prior to 1927 were probably shown with "All other manufactures of wood, n.o.p.".

Source: Dominion Bureau of Statistics.

"D" — NEWSPRINT

Data in this section have been compiled by Newsprint Association of Canada from the sources mentioned.

Throughout this section Newfoundland statistics are included, unless otherwise noted, in the Canadian totals for all years. For reference purposes only Newfoundland data to 1949 are given separately in Table 45.

Table 40. Newsprint Capacity, Production and Shipments

Capacity is shown as at the beginning of each year plus allowances for new machines from the date they are expected to operate. It is possible for production to exceed capacity partly because no allowance is made for improvements in equipment during the year.

Tons	Number of Work Days	Capacity Per Day	Production Per Day
1935	310	13,752	9,945
1936	310	13,606	11,405
1937	309	13,627	12,938
1938	309	14,676	9,362
1939	308	15,042	10,307
1940	310	15,213	12,161
1941	309	15,219	12,203
1942	309	15,415	11,180
1943	309	15,139	10,417
1944	309	15,296	10,565
1945	309	15,120	11,624
1946	308	15,068	14,630
1947	308	15,353	15,650
1948	309	15,803	16,126
1949	308	16,601	16,806
1950	307	17,025	17,194
1951	308	17,402	17,910
1952	309	17,833	18,405
1953	308	18,580	18,576
1954	311	19,030	19,306
1955	310	19,559	19,963
1956	310	20,115	20,890
1957	311	21,701	20,614

Because of variations in the number of workdays, daily capacity provides the most accurate measurement of changes in capacity.

1949	876,000	899,528	883,657	14,003	897,660
1950	992,000	1,014,703	1,002,125	15,151	1,017,276
1951	1,050,000	1,124,748	1,107,552	17,869	1,125,421
1952	1,165,000	1,146,864	1,075,540	67,166	1,142,706
1953	1,170,000	1,083,982	1,057,288	30,394	1,087,682
1954	1,280,000	1,211,156	1,120,590	92,388	1,212,978
1955	1,409,000	1,552,294	1,373,638	176,543	1,550,181
1956	1,625,000	1,717,243	1,582,742	132,628	1,715,370
1957	1,921,000	1,825,897	1,698,477	118,278	1,816,755

These figures are compiled from U.S. mill reports and shipments to overseas show only exports direct from mills. They do not include tonnage delivered to U.S. buyers and subsequently resold for exports, such tonnage being included in shipments to U.S.A. Exports as reported by U.S. Department of Commerce are thus higher than mill reports; in 1957, the Department showed exports of 173,690 tons versus 118,278 tons reported by the mills.

Source: All figures for 1913-32 and supply from Europe thereafter are compiled from U.S. Department of Commerce reports; from 1933 to date supplies from Canada and U.S. are compiled from reports to NAC and NSB respectively of mill shipments. Trade Association and government figures are not strictly comparable because of time lag between shipments and arrival dates and because of minor differences of newsprint definition.

* End of Each Year.

† U.S. total consumption is based on consumption reported by the ANPA group. For each year the percentage of total U.S. supply taken by this group is assumed to represent the percentage of total consumption consumed by the group. Total consumption is obtained by extending ANPA percentage to 100. Total consumers' stocks are computed from stock plus supplies received less total consumption in each year.

NOTE: A new classification, adopted in 1944 by the Dominion Bureau of Statistics, differs from the one given above. However, for purposes of general comparison with the years 1920-43, some of the figures given in Tables 62 and 63 may be utilized. "Paperboard", "Building Boards", and "Wet Machine Boards" would approximate the "Paperboard" group given above, while "Special Industrial Papers" and "Building Papers" would approximate the "All Other" group. The "Book and Writing", and "Wrapping" groups are virtually identical in both classifications, while "Tissue and Sanitary" is nearly comparable to the "Tissue" classification given above.

NOTE: See note Table 61.

(a) Groundwood Printing and Specialty Papers (containing more than 50% groundwood); Book Paper (including printing papers with 50% or less groundwood); Fine Papers; and Miscellaneous Fine Papers.

(b) Reported in Pulp and Paper industry only. Wood-pulp board used in paper-converting plants to produce laminated building boards is reported by pulp and paper mills as "Other Boxboard".

(c) Prior to 1949 some producers of wet machine board were classed in another industry, and small quantities reported in the Pulp and Paper industry were added with "Other Boxboards" until 1943 and with "Special Industrial Papers" since 1944.

Table 64.

Exports of Paper (Except Newsprint) — Volume in Tons

In the past, the basis and classification upon which exports of paper other than newsprint have been compiled have been modified from time to time. Consequently, only figures covering recent years are included in this and Tables 65 and 66.

Moreover, because they are compiled on a somewhat different basis, the two tables which follow are not comparable to the production figures in Tables 62 and 63.

Also, some of the exports go through a converting plant before shipment. Thus, many of the exports have a value enhanced by the conversion or packaging process, whereas the production figures show the valuation at the basic rate.

Again, the tonnage figures for certain paper products exported are not available. The dollar figures covering these exports will be found in the succeeding table under the heading "Paper Products".

—: Unfavourable balance.

Domestic exports cover exports of Canadian produce. In the last 20 years, domestic exports cover approximately 98 per cent or more of total Canadian exports.

Pulp and paper export figures 1919-1930 estimated by DBS from fiscal year figures.

* Preliminary figures.

† Includes Newfoundland since 1949. In 1948, the last year before accession, Newfoundland's Gross National Product was about $175 million.

All National Income figures from 1926 have been compiled on a revised basis in December, 1951. Figures for years prior to 1926 are not comparable.

a: The "national income" is the total of all incomes earned by Canadians in the production of goods and services during the calendar year. The "gross national product" is the market value of all goods and services produced by Canadians. It is obtained by adding to the national income two items which are not "income" but which are part of the final cost of all goods and services — namely, allowances for depreciation of plant and equipment, and indirect taxes less subsidies.

b: The "net value of production" or value added by manufacture is computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products.

The figures for the years prior to 1926, when the National Income figures were compiled on a different basis and for which the gross National product figures are not available, were as follows:

	Gross Production of Industry	Net Production of Industry	National Income
1921	$151,003,165	$73,765,200	$3,507
1922	158,950,956	81,258,232	3,671
1923	184,821,511	95,076,985	3,847
1924	179,259,504	89,629,253	3,865
1925	193,092,937	99,071,212	4,239

1953	127	58,194	1,179,665,443
1954	125	60,837	1,241,558,451
1955	125	62,205	1,326,938,138
1956	126	65,985	1,465,057,726

a: Number of mills operated during year.

b: Includes products other than pulp or paper.

Note: At the close of 1957 there were altogether 130 pulp and paper mills in Canada, which were active during all or part of the year. This total includes two asbestos paper mills which, for statistical purposes report in the Asbestos Products industry only.

Manufacturers of moulded pulp products and of laminated, coated or impregnated papers and paperboards are classed in the Paper Goods industry or in the Roofing Paper industry only, unless they produce the pulp or paper used, in which case returns are made covering pulp and paper manufacture, including paper conversion, if separate returns cannot be prepared.

Table 78.
Capital Expenditures

For the years 1948 to 1957, annual surveys of the Department of Trade & Commerce, covering some 95 per cent of the industry, show the following capital expenditures:

Year	Millions of $
1948	79.3
1949	71.8
1950	68.6
1951	108.9
1952	115.6
1953	91.9
1954	69.0
1955	118.3
1956	239.7
1957	226.5*
	1,189.6

* Preliminary.

The foregoing figures do not include capital expenditures made on the woodlands nor, of course, expenditures for maintenance and renewals.

1956	2,923,000,000e	65,985	44,298	297,571,944

(a) Woods labour is not included.
(b) Figures on capital employed were compiled by the Dominion Bureau of Statistics from 1920 to 1943. Those for 1944 on are taken from "Taxation Statistics", published by the Department of National Revenue. The two series are not exactly comparable, the former excludes the value of inactive mills, timber limits, power developments, and investments, in wholly or partly owned subsidiaries and other enterprises. The latter includes such assets but does not cover pulp and paper mills operated by companies classed in other industries according to their principal or end product such as lumber, paper boxes, and roofing paper. For the years 1944-47 the figures cover only "profit" companies; since 1948 they cover both "profit" and "loss" companies. In 1955, the 90 pulp and paper companies covered had total assets of $2,684,000,000 and current liabilities of $548,000,000.

81. Estimated Wages Paid and Numbers Employed in 1956

Wages	
Mill Workers	$297,571,944
Wood Workers*	220,841,000
	$518,412,944
Workers	
Seasonal woods workers on manufacturers' limits east of the Rockies	181,000
Permanent woods workers on manufacturers' limits east of the Rockies	5,000
Woods workers in B.C., mostly permanent	5,000
Woods workers cutting wood for sale to manufacturers	102,000
	293,000
Mill Workers, permanent	65,985
	358,985

* Includes an estimated $72,956,000 to the 102,000 woods workers cutting pulpwood for sale to the mills. Includes also those working for contractors cutting pulpwood on pulp and paper company limits. The terms of pulpwood cutting contracts are of an infinite variety ranging from those in which the contractor and his men are company employees to those in which the contractor is a free agent. Some companies cut all the wood required from their own limits.

	386,604	9.58	15,599,441	8.31
Merchandise, L.C.L.	658,774	16.32	2,280,311	1.22
Total Revenue Cars Loaded	4,037,381	100.00	187,623,304	100.00

* Loaded at stations in Canada.

Note: Car loadings of pulp and paper and pulpwood in 1957 were equivalent to 697 cars and 467 cars respectively, every day in the year. A proportion of the pulpwood car loading included pulpwood for export. Deducting an estimate for pulpwood shipped abroad, the pulp and paper industry's car loadings of pulpwood and finished products were equivalent to over eight trains of 100 cars daily. Annual loadings of pulpwood for the mills and of finished products would thus fill a train 2,600 miles in length. In addition, the pulp and paper industry creates a vast rail traffic of coal, chemicals, and other supplies required for the operations at the mills and in the woods.

Commercial customers	4,210,156	4,703,909	5,322,958
Street lighting	406,609	461,722	474,815
Export	2,718,308	4,433,460	5,103,669
Line losses and unaccounted for	6,771,233	7,294,207	7,087,607
	65,936,440	72,910,592	n.a.
Generated for own use by			
Pulp and paper industry	4,456,098	3,933,277	4,535,560
Other industries	3,172,267	5,499,386	n.a.
Mining companies	398,488	463,860	n.a.
Total electricity generated	73,963,293	82,807,115	87,938,931
Less: Exports	2,718,308	4,433,460	5,103,669
Line losses, etc.	6,771,233	7,294,207	7,087,607
	64,473,752	71,079,448	75,747,655
Plus: Imports	119,024	158,562	239,173
Canadian consumption	64,592,776	71,238,030	75,986,828

n.a.: Not available.

Note: The power consumption of the pulp and paper mills accounts for about 25 per cent of all the power generated by central electric stations for industry and for mining. Of the power generated by industry for its own use, the pulp and paper mills accounted for 55.5 per cent in 1954 and 39.7 per cent in 1955. Of the total consumption of electricity in Canada, the pulp and paper mills accounted for 24.2 per cent in 1954, 21.1 per cent in 1955 and 20 per cent in 1956. There are several single paper mills which alone consume more electric power than all the domestic customers in Montreal combined, indeed which use more power than is required to provide light for the city and all its residents. There are single pulp and paper mills which use half as much power as that consumed by all the industries in the Montreal area.

Table 94. Ten Leading Canadian Manufacturing Industries 1956

	Selling Value of Factory Shipments		Value Added by Manufacture		Salaries and Wages		Employment	
	'000 $	Rank(a)	'000 $	Rank(b)	'000 $	Rank(b)	No.	Rank(b)
Pulp and Paper	1,453,442	1	736,346	1	297,572c	1	65,985c	1
Non-ferrous Metal Smelting and Refining	1,396,565	2	511,018	2	130,140	6	30,788	6
Petroleum Products	1,228,623	3	433,352	3	64,520	9	13,483	10
Motor Vehicles	988,143	4	298,259	5	149,948	4	35,099	5
Slaughtering and Meat Packing	844,889	5	171,398	9	90,472	8	24,667	8
Primary Iron and Steel	680,860	6	352,523	4	162,881	2	36,043	3
Sawmills	639,414*	7	279,711	6	153,809	3	57,978	2
Butter and Cheese	431,255	8	101,806	10	58,431	10	20,135	9
Miscellaneous Electrical Products	393,562	9	199,625	8	99,639	7	26,501	7
Aircraft and Parts	354,510*	10	212,270	7	146,428	5	35,563	4

* Gross value of production.

a: Rank in Canadian Manufacturing Industries as a whole.

b: Rank among ten leading industries listed.

c: Covers only mill workers; the inclusion of the men permanently employed in the woods places pulp and paper further ahead.

Table 95. Gross Value of Canadian Production

	1955 '000 $	1956 '000 $
PRIMARY PRODUCTION:		
Agriculture	2,828,955	3,094,987e
Wheat	*709,475*	*675,475e*
All grains (including wheat)	*1,361,869*	*1,361,095e*
Forestry	3,959,011	4,244,330e
Operations in the woods	*829,572*	*871,050e*
Fisheries (excluding Nfl'd)	220,185	257,466e
Trapping	17,424	15,694e
Mining	2,668,541	3,069,395e
Mineral production	*1,795,311*	*2,084,906e*
Electric Power	560,383	630,473e
Less Duplication (forest production on farms)	—160,491	—164,329e
Total, Primary Production	10,094,008	11,148,016e
SECONDARY PRODUCTION:		
Manufactures	19,513,934	21,884,469e
Construction	5,310,629	6,388,832e
Less Duplication in Manufactures	—3,475,541	—3,807,469e
Total, Secondary Production (See Notes below)	21,349,022	24,465,832e
Grand Total	31,443,030	35,613,848e
MANUFACTURES:		
Paper Products	1,754,096	1,918,576e
**Pulp and paper*	*1,326,938*	*1,453,442*
Paper boxes and bags	*213,458*	*243,201*
Wood Products	1,375,343	1,477,949e
**Sawmills*	*644,482*	*639,414*
Furniture (including mattresses and springs)	*261,551*	*297,554*
Sash, door and planing mills	*238,281*	*244,835*
Printing, Publishing and Allied Industries	*619,825*	*685,884e*
Foods and Beverages	3,614,315	3,826,702
Slaughtering and meat packing	*809,466*	*844,889*
Butter and cheese	*427,093*	*431,255*
Flour mills	*221,894*	*221,770*
Bread and other bakery products	*289,019*	*306,805*
**Fish processing*	*159,888*	*169,936*
Iron and Steel Products	2,242,717	2,755,338e
Primary iron and steel	*526,318*	*680,860*
Industrial machinery	*252,944*	*329,447*
Sheet metal products	*260,167*	*296,043*
Transportation Equipment	1,950,407	2,192,935
Motor vehicles	*907,410*	*988,143*
Aircraft and parts	*354,314*	*354,510*
Railway rolling stock	*245,740*	*345,516*
Non-ferrous Metal Products	1,626,982	1,862,156
**Non-ferrous metal smelting*	*1,211,715*	*1,396,565*
Brass and copper products	*216,500*	*244,096*
Textiles	734,515	769,184e
Cotton yarn and cloth	*229,684*	*236,360*
Synthetic textiles and silk	*159,233*	*162,057e*
Knitting Mills	155,188	169,672e
Clothing (Textile and Fur)	684,362	733,770
Men's factory clothing	*250,462*	*272,146*
Women's factory clothing	*226,348*	*237,611*
Chemicals and Allied Products	1,044,079	1,111,233
Acids, alkalies and salts	*172,256*	*193,541*
Paints, varnishes and lacquers	*117,184*	*126,312*
Medicinal and pharmaceutical preparations	*108,122*	*122,592*
Soaps, washing compounds, etc.	*100,105*	*109,385*
Fertilizers	*92,499*	*83,399*
Products of Petroleum and Coal	1,160,823	1,477,000e
Petroleum products	*1,048,834*	*1,228,623*
Electrical Apparatus and Supplies	962,614	1,090,194
Non-metallic Mineral Products	514,118	562,221
Concrete products	*133,827*	*151,311e*
Glass and glass products	*80,831*	*87,169*
**Cement*	*68,813*	*79,973*
Abrasive products	*42,518*	*46,023*
**Clay products from domestic clay*	*35,260*	*37,341*
**Lime*	*16,576*	*16,671*
**Salt*	*11,869*	*14,127*
Leather Products	218,043	237,032
Boots and shoes	*125,553*	*136,682*
Rubber Products	322,412	355,584
Tobacco and Tobacco Products	250,933	239,243
Miscellaneous Manufacturing Industries	283,147	365,580
Total	19,513,934	21,884,456e

* Industries included both in primary and secondary production. e: Preliminary estimates. Other figures not yet available.

Notes: Since 1952, "value of factory shipments" has replaced "gross value of products" in all manufacturing industries except Sawmills, Aircraft and parts, and Shipbuilding, and Pulp and Paper and Veneer and Plywood until 1956. As inventories are relatively small in the industries for which factory shipments are used, the general comparability of the figures is not seriously affected.

The gross value of products or of factory shipments given above, is limited to the annual production of commodities, and is not comparable with "gross national product" given in Table 72, which includes transportation, communication, trade, finance, and service activities. The computation is entirely different and the "gross national product" comprises, in addition, depreciation allowances, other similar business costs, and indirect taxes less subsidies.

While the statistics of gross production are of interest, indicating the amount of revenue generated by the corporations and operators in the field, the total includes a large element of duplication: often the products of one industry become the materials of other industries. The net value of production obtained by deducting the cost of materials, fuel and electricity is a more accurate measure of the contribution to the national economy.

The value of agricultural production includes forest production on farmers' wood lots. As such products are also reported under forestry, the amount of duplication is deducted.

A survey of production must differentiate between the more important branches and at the same time present a grand total that will be free from overlapping. For example, the products of pulp and paper mills and sawmills are included in forestry production as being the first finished products of commercial value resulting from the productive process. They may, however, be classified under manufactures in view of the nature of the production process. The production of such industries is regarded both as primary and secondary, but the duplication is eliminated from the grand total.
